

Dental Burs (Drill pieces)

Friction Grip Burs Drills (Burs) for high speed handpiece, normally used with coolant spray and are either fluted type Tungsten Carbide (TC), which can be either Plain Cut or Cross Cut, or Diamond coated in various grits normally Ultra Fine, Fine, Medium & Coarse. Diamonds cut slower with finer cut than TC Burs

**Taper Fissure Shape
TF -**

Cuts on side only and is used for sectioning teeth

**Rose Head or
Round Shape
Rnd**

Cuts on end & side used for sectioning teeth & bone removal

**Pear Shape
Pear**

Cuts on end & side used for sectioning teeth (more effective than Rnd) also for bone removal
