Vet Pro~S Compressed Air Dental Unit

The PRO-S Dental Handpiece Control Unit is designed to deliver air and water supplies to power dental handpieces and the syringe spray. The PRO-S has three handpiece tubing's each connected to its own control block when each handpiece is removed from its holder the PRO-S automatically routes air and water supplies to it.

The flow rates are pre-set by the operator to match the handpiece and operators needs and the requirement of the handpiece selected. The control valves and switches are mounted under the front edge of the PRO-S control head easily accessible yet concealed preventing ingress of bacteria and debris.

The PRO-S control unit is mounted on a mobile cart frame. The front castors have brakes to protect against accidental movement and the cart has a height adjustment facility to ensure a comfortable working position, also providing additional storage options.
